DETAILED ACTION***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114.

Applicant's submission filed on March 23, 2006 has been entered.

Drawings

The drawings are objected to because in Fig. 5 and 8, structures represented by blocks must be properly labeled. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

Art Unit: 2851

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Fujie et al. (Fujie) (5,696,623).

Fujie discloses a lithographic projection apparatus comprising a first radiation system, a support structure that supports patterning structure, a substrate support, a projection system (Fig. 13), a fluid cleaning system (Fig. 4) that cleans a fluid to be introduced into a region in which optical elements are disposed comprising a fluid inlet (204), a cleaning zone (204), a second radiation system (203) and a nucleated surface (205, the precipitation region would have nucleation sites in order for the precipitates to accumulate in that region).

Claims 10-27 are rejected under 35 U.S.C. 102(e) as being anticipated by Mori et al. (Mori) (EP 0874283).

Mori discloses a lithographic projection apparatus comprising a first radiation system, a support structure that supports patterning structure, a substrate support, a projection system (Fig. 11, 14), a fluid cleaning system that cleans a fluid to be introduced into a region in which optical

elements are disposed comprising a fluid inlet, a cleaning zone, a second radiation system and a nucleated surface (col. 5, lines 23-24, col. 7 line 15 – col. 8, line 26, col. 19, line 11-21).
